PROJECTS

1) **Heart Disease prediction (AIF):**

   The main aim of this project is to detect the probability of person who will be affected by a severe heart problem or not. This project will help reaching out interesting inferences from data to derive some meaningful results.
   (link: https://github.com/kalyanivaidya999/Heart-disease-prediction)

2) **Prediction Of absenteeism:**

   This is a logistic regression model and main aim to develop this model is to predict the probability of an individual being excessively absent from work in any company or corporation.
   (Link: https://github.com/kalyanivaidya999/Prediction-Of-absenteeism)

3) **My Portfolio Website:**

   I have created interactive portfolio which has included all my skills, qualification, projects and certifications with six different pages and links in it by using HTML-5 and CSS-3.
